Below breakeven — let's find why

WHAT I NOTICED

"Iced Matcha is your breakout star"

Up 27.9% month-over-month. At this rate it will overtake Filter Coffee within 6–8 weeks. Consider featuring it more prominently on the menu.

"Your attach rate is half the benchmark"

8.2% vs 18–25% for specialty cafés. Every extra pastry or second drink added to a bill lifts gross margin by 12–18%. There's easy margin sitting on the counter.
